

0-10 Bears Number Line

Instructions are adaptable for teachers/parents/carers
and activities can be used with 1 child, a small group or a class.

Ideas for Activities

1. Use as teaching tool for whole class or group or individual. With children order the bears numerically from 0-10 and/or 10-0.
2. Play a game by giving out all cards randomly to 11 children and ask them to order themselves either 0-10 or 10-0.
3. Fix bears to board and ask children in turns to draw a matching quantity of 'sweets' for the bear of your choice.
4. Use as a teaching tool by ordering first with the children and then removing one bear and asking - which bear is missing?
5. Use as a teaching tool by first ordering bears with children and then asking mathematical questions such as - Which bear comes after number ____? or Which bear is in between bears numbers ____ and ____? Or Which bear is one more than bear number ____? etc.
